**Subject:** RE: GPRA Goals

CDPHE is now working on AMERICAN IRON & METAL and SUMMIT PRESSED BRICK AND TILE CO, so I anticipate completion in 2014. FF needs to be contact for two or three of the sites. I don't know who the lead is for LAS ANIMAS AUXILIARY FIELD #2, but would have assumed FF although the table doesn't suggest that.

AMERICAN IRON & METAL	CON0008000895	N	N	PO	PA Ongoing
CAMP HALE	CO0011311078	N	N	RW	Referred to Removal - Further Assessment Needed
FORMER LOWRY BOMBING & GUNNERY RANGE	CO0009179068	N	N	PN	Fed Fac Preliminary Assessment Review Start Needed
LAS ANIMAS AUXILIARY FIELD #2	CO0010389048	N	N	PS	PA Start Needed
SUMMIT PRESSED BRICK AND TILE CO.	CON0008000054	N	N	PS	PA Start Needed

For the older non-FF sites, I anticipate CDPHE will submit a Letter Report for Sweeney Mill – It needs closed out in 2014. We thought about planning a sampling SR prior to the major floods last September. The closed impoundment survived that flood event. was needed with a letter report or SAM memo to the file.

Other 2014, completions/closeout should include: SANTA FE (BRIDGE) CULVERT - it should get rolled into the Colorado Smelter site tracking information.

Great West Gold & silver is presently being worked on and I think Jean has taken that over, along with Half Moon and Mt. Champion.

Silver Bell and Independence Mine have been re-evaluated by CDPHE in Letter Reports. SAM reviews needed and Final Assessment Decisions should be able to be files in 2014.

KENDRICK & GELDER SMELTING CO is within the Upper Animas site area – not sure, but perhaps Removal could do an assessment here due to the fine-grained slag and proximity to the town of Silverton. This was a site that was evaluated long ago by another SAM, so this and other non-FF sites showing Assessment Complete - Decision Needed, need some file review and therefore should likely be assigned to START4 for SR or see if CDPHE wants to re-evaluate them.

**Subject:** FW: GPRA Goals

Attached are 2 excel spreadsheets with the list of sites which can be used towards our GPRA goals of completing PA for sites > 5 years old (goal is 1 site) and issuing a FAD for sites > 16 years (goal is 6 sites). Please review these list and identify those sites where these actions can be completed in FY2014.
